# Vaisala Navigator WID 733

Map view of Vaisala RoadDSS Navigator

The Vaisala RoadDSS Navigator is a hosted web user interface for viewing past, present and future road weather data. The application displays data collected by the Vaisala Global Data Management Center, which handles data collection from the road weather networks around the world. The application consists of a set of dynamic web pages that can be viewed with a simple Internet connection. The Vaisala RoadDSS Navigator also features GIS maps which are optimized to clearly display road weather data, including Thermal Mapping and mobile weather observations, where available. The Navigator user interface is part of the Vaisala RoadDSS Software Suite and provides the added functionality of providing detailed reporting. The reports save you time in compiling information from the system making your job easier. Navigator also includes detailed alerting functionality that continuously monitors specific parameters you make decisions on, and then provides you with notification as soon as those

thresholds are reached. Vaisala RoadDSS Navigator was designed by Vaisala customers, which means it fits into your operations more naturally.

## Customizable Views

The Vaisala RoadDSS Navigator has been designed with user convenience in mind. You can easily customize the application to suit your needs. This will allow you to view only the important and relevant information, which will help you focus quickly and easily on the job at hand.

## Browse Observations and Forecasts with Ease

The application has many features that make browsing the data very easy. For instance, with the powerful Time Slider feature you can quickly see on the map page all the observations and any forecasts that are available for 24 hours on either side of the actual time. This gives an unparalleled overview of past, present and future conditions at a glance. It also takes less time to

## Features/Benefits

- Easy-to-use interface with customizable views
- No need to install software on clients – works with latest versions of Microsoft Internet Explorer and Mozilla Firefox browsers
- Easy to implement and maintain
- See real-time data on a map, table or graph
- Alerting and Alarming Feature
- Easy access to service from anywhere with an Internet connection
- GIS maps optimized for displaying road weather data
- Historical data available
- Compare and contrast road weather observations with other road information all in the same application
- Configurable e-mail and SMS alerts
- Supports animation of radar, satellite and other map based information where available
- Generate reports quickly and in a printer friendly format
- Station data export for easy data analysis offline

train staff on how to use the program, which results in a quicker return on investment.

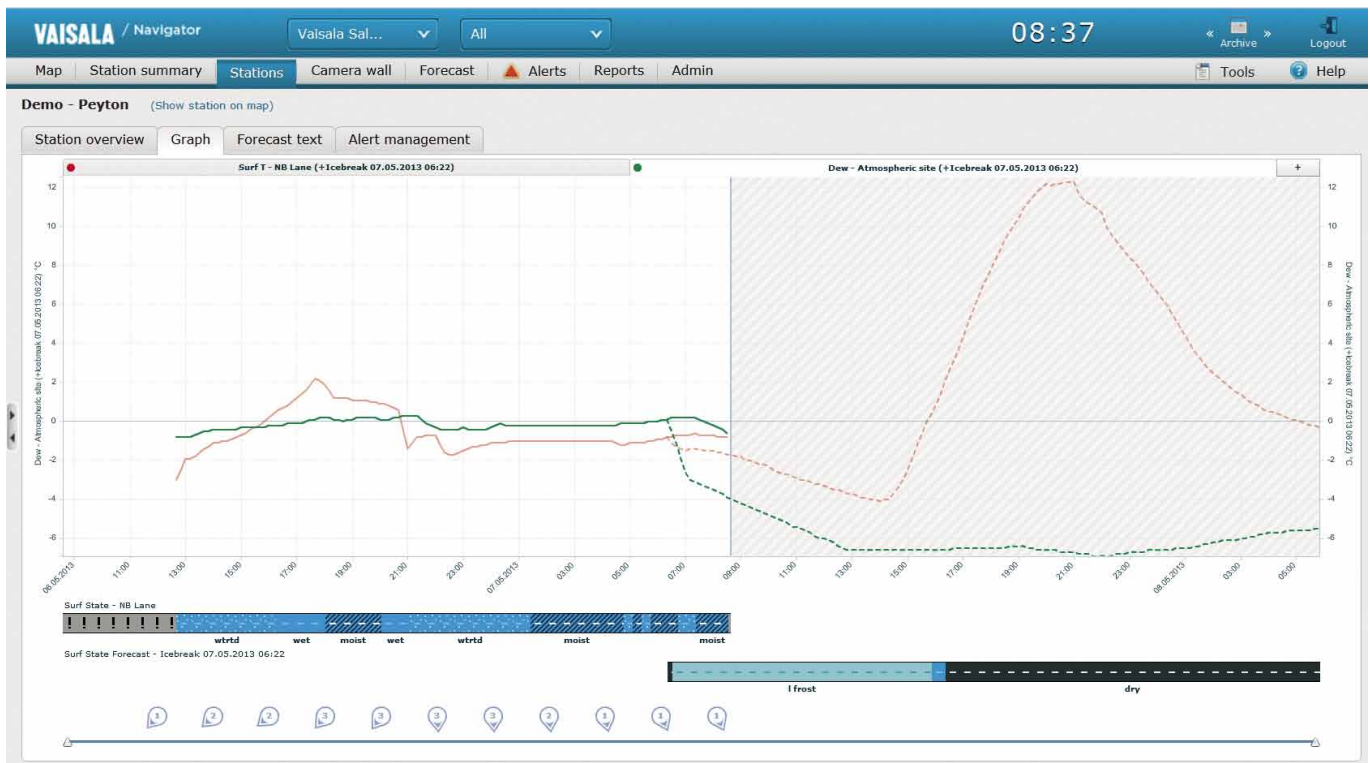

## All the Relevant Data in the Same Application

One of the key features in the Vaisala RoadDSS Navigator is it has the ability to compare and contrast road weather information with other relevant data. Where available this could include weather radar, satellite and traffic counting data, all in the

same application. With all this data in the same place you can easily see how the weather affects traffic flow, and plan your actions accordingly. In addition, some features can be conveniently animated for easy representation of moving weather events and developing situations that need monitoring.

## System requirements

- Internet connection
- Web browser - supported browsers are Microsoft Internet Explorer v. 7 or later and the latest Mozilla Firefox
- Cookies must be enabled
- Adobe Flash Player v. 10 or later
- To view PDF reports, Adobe Reader v. 9 or later
- To view data exports, Microsoft Excel v. 2003 or later
