Indigo 200 series is a host device for Vaisala's CO₂ probes GMP251 and GMP252, and the H₂O₂ probe HPP272.

Vaisala Indigo 200 Series Transmitters are host devices where the measurement result of Vaisala Indigo compatible probes is shown on the display and/or converted into other formats, for example, analog output signals and to a level where the relays are activated. These probe hosts are plug-and-play devices for current and future Vaisala Indigo compatible probes. The host device has a color LCD display; Indigo 201 is also available as a non-display version with a LED indicator for notifications.

Vaisala Indigo compatible probes are connected either directly to the host with a probe locking wheel, or by using a cable between Indigo 200 and the probe.

The Indigo 200 has a browser-based wireless (WLAN) configuration interface for a mobile device or

computer that supports a wireless connection. The host device and the probes connected to it can be configured using the wireless user interface. It also allows for temporary viewing of the measurement data.

The surface of the Indigo 200 enclosure is smooth, which makes it easy to clean. It is also resistant to dust and most chemicals, such as, H₂O₂, and alcohol-based cleaning agents.
